TITLE : MEMORY REWRITE CIRCUIT

ABSTRACT : PROBLEM TO BE SOLVED: To construct a memory rewrite circuit of a simple configuration in a television receiver without the need for disassembling in rewriting the memory.

SOLUTION: The memory rewrite circuit is provided with a stop circuit 2 that stops communication of a signal between a microcomputer 6 and a memory 5 upon the receipt of a signal from a video input terminal 7, a conversion means 3 that outputs the signal from the video input terminal 7 to the memory 5 via a clock line 9, and a conversion means 3 that outputs a signal from an audio input terminal 8 to the memory 5 via a data line 10.
